C 3.266/2:

Acknowledgments

This report was prepared in the Governments Division under the general supervision of **Vance Kane**, Assistant Division Chief for Programs. **David Kellerman** directed the project and was assisted by **Michael E. Grimwood**, **Carl Handy**, and **R. Ross Saberlin**.

Computer processing operations were directed by **Steve Poyta**, assisted by **Michael Freeman**, **Arthur Older**, and **Mildred Y. Keull**, under the supervision of **Judith Jennings**, Chief of the Computer Utilization Branch. **Corrine W. Davis** supervised preparation of publication copy, assisted by **Esther Fogwell** and **Ruth Samuels**.

Guidance and supervision for this report were provided by the Budget Review Division and Planning and Communications Management Division of the Office of Management and Budget.

Grateful acknowledgment is made of the cooperation of various Federal Government departments and agencies for providing information needed for this report.

For information regarding data in this report, contact **John Coleman**, Governments Division, Bureau of the Census, Washington, DC 20233 [(301) 763-7366].

INTRODUCTION

The Consolidated Federal Funds Report is a presentation of Federal Government expenditures or obligations in State, county, and subcounty areas of the United States. U.S. Territories and the District of Columbia are included. The data for this report were obtained from reporting systems which exist in various Federal Government agencies. These data have been consolidated and tabulated in a standard format for presentation in a series of publications covering different levels of geographic detail. These publications are:

- Federal Expenditures by State for Fiscal Year 1985
- Consolidated Federal Funds Report Fiscal Year 1985, Volume I: County Areas
- Consolidated Federal Funds Report Fiscal Year 1985, Volume II: Subcounty Areas

Data are also available on magnetic computer tape. Information on publications or computer tapes appears at the end of this section.

This report was prepared in accordance with the Consolidated Federal Funds Report Act of 1982 (P.L. 97-326). The acronym CFFR, as used throughout this publication, refers to this Act and the associated data collection and processing program.

Report Coverage

The *Consolidated Federal Funds Report* (CFFR) Volume II covers Federal Government expenditures or obligations for the object categories listed below. For fiscal year 1985, amounts reported totaled \$306.2 billion for the grant and procurement categories, and \$123.8 billion for other Federal assistance (loans and insurance).

- Grants (\$112.1 billion)
- Procurement (\$194.1 billion)
- Direct loans (\$11.3 billion)
- Guaranteed or insured loans (\$36.7 billion)
- Insurance (\$75.9 billion)

Dollar amounts reported under these categories can represent actual expenditures or obligations. Users should be aware of the differences in this coverage which varies in accordance with the data, as described later under "Data Sources." As a general guide, however, the grants and procurement data represent obligated funds, while data on loan and insurance programs generally represent the contingent liability of the Federal Government.¹

¹Several grant programs in the CFFR were reported on the basis of expenditures, since the data were taken directly from the *Federal Expenditures by State* report. These are detailed in the "Data Sources" section.

The financial activity of all Federal Government agencies are covered, with exceptions for those agencies which do not submit data to any of the Federal reporting systems that served as sources of information for the CFFR. These agencies are also listed under the heading "Amounts Excluded From CFFR Coverage."

Data Presentation

The publication *Federal Expenditures by State* presents data by State only. However, it contains detail on Federal expenditures by program and (in some cases) agency, not found in the CFFR Volumes I and II publications.

Volume I of the *Consolidated Federal Funds Report* presents data by State and county area. Coverage includes all object categories of Federal Government finance.

Volume II presents data by State, county area, and municipal or township government. However, coverage is limited to the object categories of grants, procurement, direct loans, guaranteed loans, and insurance. Statistics on Federal Government salaries and wages, direct payments for individuals, and other direct payments were not available at the subcounty level of detail.

All data in volumes I and II of the CFFR are presented by object category, with some detail for Defense/nondefense breakdowns. In this volume, the Federal grant payment under the general revenue sharing program is displayed separately. This is the only individual Federal program for which data are separately published. Geographic detail of Federal finances on a program basis can be found in the publication *Federal Expenditures by State for Fiscal Year 1985*, or on the CFFR data file available on magnetic computer tape.

The basis for the geographic distribution in the CFFR varied according to the object category and the data source. These are detailed later under the heading "Data Sources." The following general guidelines applied:

- Grants—location of initial recipient
- Procurement—place of performance
- All other object categories—recipient location

For grants, users should note that some dollar amounts appear at the State capital cities (and their respective county areas). This reflects the coding of grants to the State governments at the capital city, even when such grants represent payments that are subsequently passed-through to local jurisdictions or represent programs that are spread out over all areas of the State in terms of financial impact. Appendix C lists the State capital cities and their respective county areas.

The geographic presentation of data on grants is described more fully in the sections below "Estimates of Substate Grant

Distribution." Most large volume grant programs involve a direct Federal-to-State transfer of aid, which the State government subsequently redistributes. Data for several of these grant programs were treated differently in the CFFR, as described below.

Included in the geographic listings are the terms "U.S. undistributed," "State undistributed," "county undistributed," and "balance of county." These are used for data that were reported under one of the following conditions:

1. Without specific geographic designations for either State, county, or municipality. Data would thus be reported at U.S. undistributed, State undistributed, or county undistributed, respectively. Examples of such data include procurement actions of less than \$10,000, which were reported as one data record and assigned to "U.S. undistributed."
2. With a geographic designation at the subcounty level that did not correspond to any of the 35,810 municipal or township governments identified in the census of governments. In these cases, data were assigned to "balance of county" for the county area in which the reported subcounty unit was located.

The congressional districts shown reflect the 99th Congress, which was in session during Federal fiscal year 1985. For those States which have only one at large representative, the congressional district is shown as "00."

As indicated previously and explained in detail later under "Data Sources," dollar amounts reported can reflect expenditures or obligations. In some cases, dollar amounts shown will be negative. Such amounts reflect deobligations of financial assistance that had been previously awarded, and generally appear in the grant object category.

Summary of Methodology

This is a consolidated report, developed by bringing together available statistics on Federal Government expenditures or obligations. The first phase of the CFFR program was to identify the available data sources. The CFFR Act specified that the following reporting systems and agencies be used as data sources:

- Federal Assistance Award Data System
- Federal Procurement Data System

In addition to these, several other Federal agencies were requested to provide data, usually for selected programs (see section "Data Sources"). Most of these were agencies which had not yet begun reporting under the requirements of the Federal Assistance Award Data System. For this volume, data from the U.S. Postal Service (covering procurement) was included.

Selected data were obtained from the information on payments to State or local governments reported by Federal agencies for the Census Bureau's Federal Aid to States survey, in accordance with the CFFR Act and OMB Circular A-11. These data covered Federal Government grants that were not required to be reported in the Federal Assistance Award Data System, such as the Federal Government annual payment to the District of Columbia.

All data submitted for the CFFR were assigned a program identification code and object code. The program identification code

format was patterned after the *Catalog of Federal Domestic Assistance* (CFDA) program number. For all data taken from the Federal Assistance Award Data System, the CFDA number was used for the program identification code. For all other data submissions, a unique code was assigned. Although not presented in this CFFR publication, the program identification code is contained on the CFFR data file available on magnetic computer tape.

The object code assigned to each data record submitted for the CFFR consisted of two alphabetic characters to designate the broad object category of Federal expenditure to which each data record belonged. These were the categories described previously (grants, procurement, etc.).

Both the program identification code and the object code were used throughout the CFFR processing. For example, during the data edit and review stages, dollar amounts were tallied by program or object category for comparison with other sources of information on Federal outlays. In addition, the object code became the primary basis for the table presentation in the CFFR publications (all grants data were grouped together, all direct loan data were grouped together, and so forth).

The processing of all data submitted for the CFFR involved the six steps detailed below. Exceptions existed for some submissions, often the result of the geographic coding methods used by the Federal agency. These exceptions are detailed later under "Data Sources."

1. Verification of edit totals required comparing dollar amounts and record counts actually submitted with totals provided on transmittal documentation from each agency. Since most submissions were on magnetic computer tape, this process involved ensuring that the tape submissions were in the prescribed format. Any discrepancies were brought to the attention of the submitting agency, and corrections made as needed.
2. Verification of geographic coding applied to those submissions received on computer tape. This process is described in more detail later, in the section "Geographic Presentation and Coding."
3. The third step in processing was to sort all data by program identification code and geographic unit. This enabled review tables to be compiled which showed data by State, county, or subcounty area for each Federal program or object category. At this stage, a national total of Federal dollar amounts in the CFFR were compared to totals for the same programs that appeared in other data sources such as the Federal Budget. Data were also reviewed by program or object category at the State, county, or subcounty level. In this manner, patterns of Federal Government spending for any category, such as Defense salaries and wages, were reviewed.
4. This third phase of processing was thus concerned with review and verification of dollar amounts by program and object category. Corrections were made as needed, based upon consultation with the Federal agency submitting the original data.
4. Since data from different sources were generally submitted on the basis of different geographic coding, the next step in CFFR processing was to convert all data records to standard

geographic designations. This is described later in the section "Geographic Presentation and Coding."

Once converted to a standard geographic designation (governmental unit codes), program and object totals were again reviewed. At this time, data records were combined so that only one record existed for each unique combination of geographic code, program identification code, and object code. Even though multiple grant awards may have been made under a single program to any given geographic area, they were all combined into a single record for the fiscal year. If 10 Community Development Block Grants were awarded to New York City during fiscal year 1985, they were combined into a single record for Community Development Block Grants funding within New York City. Combining like data records in this manner was the final step in processing for each CFFR submission, or data file. This process also reduced the total number of data records in the CFFR to 282,769.

All data files were then merged together to form a consolidated file. This enabled the compilation of total Federal expenditure or obligation by object category and geographic area. These data were reviewed and final corrections made to the CFFR data file.

This final data file contained records in geographic detail only. County, State, or United States total records were not part of the data file. Nor were summary totals by object category actually contained in the data file. All of these summary records were tallied during preparation of the tables in volumes I and II of the CFFR. In this way, totals published in the CFFR represent summations of the more detailed data contained on the CFFR data file.

Table preparation also entailed processing the CFFR data file in conjunction with the CFFR geographic reference file. The former contained all information associated with the Federal program or object category of spending being reported. The geographic reference file contained all pertinent information concerning the governmental unit for which data were published. This information included the State, county, and municipal/township name, the 1984 population, the congressional districts, and all associated geographic coding.

Relationship to Federal Expenditures by State

The publication *Federal Expenditures by State for Fiscal Year 1985* presents State-by-State distributions of Federal Government expenditures. The total amount reported was \$788.5 billion. Procurement, loans, and insurance data in that publication are the same that appear in the CFFR Volume II. However, amounts for Federal grants to State and local governments in the CFFR generally represent obligations, whereas in *Federal Expenditures by State*, grants to State and local governments represent actual expenditures of the Federal Government. In this volume, grants total \$111.9 billion, compared to \$111.7 billion in *Federal Expenditures by State* (\$105.5 billion for grants to State and local governments, and \$6.2 billion for grants to nongovernmental recipients).

Table 2 of the *Federal Expenditures by State* report covers Federal grants to State and local governments, by agency and program. Data reported were submitted to the Census Bureau

in accordance with OMB Circular A-11 and the Census Bureau's annual Federal Aid to States reporting guidelines. These data were formerly published in the annual Treasury Department report *Federal Aid to States*. The detailed presentation contained in table 2 replaces that publication, effective with fiscal year 1983 data.

The data on grants to State and local governments in *Federal Expenditures by State* were reconciled with amounts in the Federal Budget. Special Analysis H of the Federal Budget for Fiscal Year 1987 contains breakdowns of this grant data by function and by region. The definitions applied in the Budget for grants to governments served as the basis for reporting in table 2.

Federal Expenditures by State also contains data on Federal salaries and wages (table 3), Federal direct payments for individuals (table 4), Federal procurement (table 5), and other direct Federal expenditures (table 6). These data correspond to that presented by object category in the CFFR, but are shown by program or Federal agency wherever possible. The CFFR publication does not contain such program or agency detail.

The other significant difference between *Federal Expenditures by State* and the CFFR is the level of geographic detail for which data are shown. The former distributes data only on a State-by-State basis, while the CFFR contains county area and subcounty information.

Users should consult the introductory text in the publication *Federal Expenditures by State* for a detailed explanation of the grants data that appear in that report.

Availability of Data

All three publications associated with the Consolidated Federal Funds Report are for sale to the public through the Government Printing Office.

The CFFR data file is also available on magnetic computer tape. As indicated earlier, the data available on computer tape are more detailed than the summarized data presented in the published reports. The CFFR data file contains 282,769 data records. Each record contains the following fields:

- Government unit code (State, type, county, unit)
- Program identification code
- Object code
- Federal funding sign
- Federal funding amount
- Federal Information Processing Standard (FIPS) code

All appropriate tape documentation and data file descriptions are provided with each CFFR computer tape file.

An accompanying CFFR geographic reference file is also available on computer tape. This file contains the names and governmental unit codes for all State, county, municipal, and township units in the Nation. In addition, the file contains associated geographic codes (FIPS, GSA, and Census Bureau place codes), the 1984 population, and the congressional districts serving each governmental unit.

Users interested in obtaining computer tapes of the *Consolidated Federal Funds Report* data files should contact the Bureau of the Census, Governments Division.

DATA SOURCES

Appendix D lists the data sources used for the volume II of the CFFR, arranged by major category of Federal Government finances. The description of the data sources which follows includes explanations of the coverage, conceptual basis for reporting (expenditures versus obligations), geographic basis for reporting, and other information important for interpreting the data in the CFFR. The use of the term FIPS geographic codes in the following text refers to the Federal Information Processing codes maintained by the National Bureau of Standards, Department of Commerce.

Grants

As indicated in appendix D, the principal source of the grants data in volumes I and II of the CFFR was the information submitted for the Federal Assistance Award Data System (FAADS). The Bureau of the Census is the Executive Agent for the Office of Management and Budget, and is responsible for the operation of the FAADS reporting systems. Data on financial assistance awards are submitted quarterly by Federal Government agencies, and combined to form a single report on Federal Government financial assistance awards. The report is distributed to the Congress and to State governments. In addition to grant awards, the FAADS program covers direct payments to individuals (such as retirement benefits), direct payments for specified use (such as food stamps awards), cooperative agreements, guaranteed loans, direct loans, and insurance programs of the Federal Government. All financial assistance awards in FAADS are identified by a *Catalog of Federal Domestic Assistance* program number. Coverage of these types of financial assistance other than grants are described under the appropriate data source section later in this text.

For grants, the FAADS data represent the Federal obligation incurred at the time the grant is awarded. The amounts reported do not represent actual expenditures, since obligations in one time period may not result in outlays during the same time period. Moreover, initial amounts obligated may be adjusted at a later date, either through enhancements or deobligations. These deobligations may appear in the CFFR data as negative amounts. Users should be aware of what these amounts represent and use care in interpreting such data.

FAADS data on grants for fiscal year 1985 were derived by summing the quarterly reports that covered financial assistance awarded between October 1, 1984, and September 30, 1985. The grants data from FAADS that were carried forward to the CFFR totaled \$98.3 billion, or about 88 percent of all grants reported.

All grant awards in FAADS were reported by State, county, and city of initial grant recipient. Submitting agencies used either FIPS codes for States, counties, and places, or General Services Administration location codes.

Grant data in volumes I and II of the CFFR are distributed by State, county, and city for the \$98.3 billion of grants which were taken from the FAADS.

Processing of the FAADS grants data involved the following steps:

1. Data classified as grants included any FAADS data records that contained a type of assistance code for revenue sharing, block grants, formula grants project grants, or cooperative agreements. These classifications were cross checked with the definitions in the *Catalog of Federal Domestic Assistance* and the *Federal Budget*.
2. The geographic distribution of data was based upon the State, county, and place codes in the original data records. These geographic codes were corrected to standardized governmental unit codes as described under "Geographic Presentation and Coding."
3. Data for grant awards that had the same program number, object category code, and governmental unit code were combined into a single data record for the CFFR. Each CFFR record would thus represent one or many Federal grant awards to a particular location. Amounts were summed, with negatives (deobligations) netted against positive records.

Grants data from the Federal Assistance Award Data System represent awards to the initial recipient. For many grants, this recipient is the State government, even though the grant monies are subsequently distributed to county, municipal, or township governments. While some of these "pass-through" grants appear in the CFFR at the State capital city (and in the associated county), the section below on "Estimates for Substate Grant Distributions" describes the CFFR treatment for selected large grant programs.

The impact of pass-through and large volume grants to States should be carefully considered by users analyzing grants data on a geographic basis. Some amounts reported at the State capitals may not reflect the true impact of Federal funds in those geographic locations. However, the six grant programs for which substate estimates are included in the CFFR represent \$48.6 billion, or about 43 percent of all grants in the CFFR.

Information on grants for the general revenue sharing program was provided by the Office of Revenue Sharing, Department of Treasury. All grants data for general revenue sharing represent actual outlays during the fiscal year. All general purpose local governments (counties, municipalities, townships) in the Nation are eligible to receive general revenue sharing funds. Each recipient was identified by its associated government unit code, since the Office of Revenue Sharing makes use of this Census Bureau coding scheme in its program. It was the identification of all general purpose local governments which receive revenue sharing funds in the CFFR, as mandated by the CFFR Act, that resulted in these governmental units serving as the basis for the geographic presentation.

Indian Tribes and Alaskan Native Villages, as defined in the State and Local Fiscal Assistance Act, are also eligible to receive general revenue sharing funds. Amounts paid to such recipients were included in the figures for "county undistributed," for the particular county area in which such recipients are located.

Expenditures under the general revenue sharing program totaled \$4.6 billion in fiscal year 1985.

The remaining grants data for the CFFR were taken from data submitted to the Census Bureau pursuant to the annual Federal Aid to States survey, its reporting requirements, and OMB Circular A-11. These submissions are required annually by all Federal Government agencies which make payments to State or local governments.

Such data were previously collected and published annually by the Division of Government Accounts and Reports, Fiscal Service, Bureau of Government Financial Operations, Department of the Treasury. The annual Treasury Department publication *Federal Aid to States*, which contained these data, has been replaced by the annual Census Bureau publication *Federal Expenditures by State*. Reference should be made to that publication for additional information on the coverage and reporting requirements associated with these grant data.

Grant programs data were taken from the *Federal Expenditures by State* publication to ensure comprehensive coverage in the CFFR. These grants are not part of the FAADS reporting because they are not listed in the *Catalog of Federal Domestic Assistance*. Data were available only at the State area level of reporting.

Procurement

Statistics covering Federal Government procurement were provided by the U.S. Postal Service (USPS) for Postal Service procurement and the Federal Procurement Data Center (FPDC) for procurement actions of all other Federal agencies, including the Defense Department.

Amounts provided by the USPS represent actual outlays for contractual commitments, while amounts provided by the FPDC represent the value of obligations for contract actions, and do not reflect actual Federal Government expenditures. In general, only current year contract actions are reported for data provided by the FPDC; however, multiple-year obligations may be reflected for contract actions of less than 3 years duration.

The FPDC collects procurement statistics on a quarterly basis from most Federal Government departments and agencies, and provides these data according to the place of performance rather than the location of the prime contractor. Excluded from the procurement totals reported are the amounts for the judicial and legislative branches of government, and most intergovernmental transfers of funds. Also excluded from the totals are amounts for procurement in foreign countries. However, foreign procurement awards were \$10.2 billion in fiscal year 1985, with \$9.5 billion for the Defense Department, and \$.7 billion for all other Federal Government agencies other than the USPS.

Most contract actions provided by the FPDC with values under \$25,000 for the Defense Department and under \$10,000 for nondefense agencies were not distributed by State and territory. Such amounts were reported as "U.S. undistributed."

Procurement data awarded by the USPS include all outlays made under formal contractual agreements. The FPDC data include contractual actions for construction, purchases of equipment, and other purchases of tangible items by the Federal Government. Also included with the FPDC data are contractual actions for services often not generally associated with procurement, such as the purchase of utilities, building leases, and other services entered into via contractual agreement.

U.S. Postal Service procurement data were provided by State and county area only. For this reason, such data appear only at the county undistributed level in volume II of the CFFR.

Procurement data provided by the FPDC were distributed according to place of performance, as designated by FIPS State/county/place geographic coding. These geographic codes were matched against the government unit codes comprising the geographic basis for CFFR, and assigned to any units where a match was found. Unmatched data records were distributed to "balance of county" represented by the State/county portion of the FIPS geographic code. (For those FPDC data records submitted only with a State/place code, a county code was first assigned via a geographic conversion file).

Guaranteed Loans, Direct Loans, and Insurance

Except as indicated in Appendix D, data on loans and insurance programs of the Federal Government were reported for the Federal Assistance Award Data System. Amounts reported in these object categories reflect the contingent liability of the Federal Government, in accordance with the FAADS reporting instructions. Data do not represent actual expenditures associated with the loan or insurance programs. Any actual outlays under these programs, such as insurance claims paid by the Federal Government, would be included under the direct payments categories in the CFFR.

Federal Government contingent liability can vary by program, and caution should be used in comparing one Federal loan or insurance program to another, or in interpreting the data presented to reflect actual Federal outlays. The following should be noted:

1. Amounts guaranteed or insured do not necessarily represent future outlays.
2. Timing arrangements can affect the Federal Government liability reported. For example, all policies under the National Flood Insurance Program must be renewed annually and therefore appear significantly larger in the FAADS/CFFR data than do insurance or loan guarantee programs that extend over lengthy time periods. The latter only would be reported in FAADS/CFFR in the time frame (quarter and fiscal year) in which the insurance policy or loan guarantee is awarded.
3. All amounts reflect the dollar value of loans or insurance coverage provided during the fiscal year, and not the cumulative totals of such activity over the life of the program.
4. Direct loans are not reported on a net basis, as in the Federal Budget, but rather are shown in terms of total amount loaned.
5. Programs otherwise similar can vary in the share of the total liability that the Federal Government guarantees or insures. Certain Veterans Administration guaranteed loan programs are guaranteed only up to a stated maximum dollar value, for example. In these cases, the Federal Government contingent liability is less than the total value of the loan or insured policy agreement.

Guaranteed loans, direct loans, and insurance are reported in FAADS by State and county area, or by State, county, and place.

Data on the National Guaranteed Student Loan program (Catalog of Federal Domestic Assistance number 84.032) are not reported for the Federal Assistance Award Data System, and were obtained separately from the Department of Education.

Detail on particular loan or insurance programs is available in *Federal Expenditures by State* (on a State-by-State basis only) or on the CFFR data file available on magnetic computer tape.

Estimates for Substate Grant Distributions

Many Federal grant programs involve a direct payment to State governments, which are then responsible for program administration. Examples include: grants that are "passed-through" to local governments (such as block grant programs); grants, such as for highway construction, in which the financial impact of Federal funds are spread out over all areas of the State; and grants or assistance programs such as Aid to Families with Dependent Children, which the State can administer but for which the ultimate beneficiaries are found throughout the State.

For the six grant programs listed below, the CFFR includes estimates of the substate distribution of Federal expenditures. This represents a major revision in the CFFR from the fiscal year 1983 reports, for which these grant programs were geographically assigned to the State capital city (and county area). The six grant programs account for \$48.6 billion, or about 43 percent of all grants reported in the CFFR.

These grant programs and their *Catalog of Federal Domestic Assistance* program identification numbers are:

- Highway Planning and Construction (20.205)—\$13,540.7 million
- Educationally Deprived Children—Local Education Agencies (84.010)—\$3,195.4 million
- Child Support Enforcement (13.679)—\$576.8 million
- Medicaid (13.714)—\$22,610.1 million
- State Health Care Providers Survey Certification (13.777)—\$85.7 million
- Assistance Payments, Maintenance Assistance (AFDC) (13.808)—\$8,543.0 million

Data for all of these grant programs are distributed by county. All data came from information reported by Federal agencies for the Federal Assistance Award Data System, except for Educationally Deprived Children. For this program, data were estimated by county area, based upon allocation amounts developed by the Education Department for the Compensatory Education for the Disadvantaged program.

County area data for the Highway Planning and Construction program represent the actual place of performance—the highway location. This information is reported by the Transportation Department for the Federal Assistance Award Data System.

County area data for the four grant programs of the Health and Human Services Department are estimates based upon the distribution of beneficiaries.

GEOGRAPHIC PRESENTATION AND CODING

Background

The Consolidated Federal Funds Report Act calls for reporting by State (including Territories), county or parish, congressional district or municipality. At the subcounty level, the Act refers to municipality as any unit of local government that received Federal

assistance under the State and Local Fiscal Assistance Act of 1972—the General Revenue Sharing Program. For this reason, the geographic basis for presentation on the Consolidated Federal Funds Report is the governmental classification system developed by the Bureau of the Census in its census of governments program. This governmental classification system, described in more detail below, defines the universe of eligible general purpose governments under the State and Local Fiscal Assistance Act.

Volume I presents data by State and county area. The District of Columbia and the United States Territories of American Samoa, Guam, Northern Mariana Islands, Puerto Rico, Trust Territory of the Pacific, and the U.S. Virgin Islands are included. In addition to county area, municipal governments which are independent of any organized county are included here as county equivalent areas. Appendix A contains a listing of these municipalities.

Data for subcounty areas are presented in this volume of the Consolidated Federal Funds Report. Summary data by State and Territory are presented in the publication *Federal Expenditures by State for Fiscal Year 1985*.

Explanations of the geographic coding used by the different data sources for the CFFR were described previously in the "Data Sources" section.

Governmental Units

There were 82,341 governmental units in the United States according to the 1982 Census of Governments, distributed as follows:

U.S. Government	1
State governments	50
Local governments	82,290
County	3,041
Municipal	19,076
Township	16,734
School district	14,851
Special district	28,588

Exact definitions of governmental units are available in Volume 1 of the 1982 Census of Governments, *Governmental Organization*. This publication describes the structure and organization of State and local governments throughout the Nation.

The *Consolidated Federal Funds Report* presents data by State, county, and subcounty area, making use of governmental units to represent geographic areas. For States and Territories, governmental jurisdictions have fixed, stable boundaries which correspond to well-defined geographic areas. For county and subcounty governmental units, however, there can be significant differences between the concept of a governmental unit and a specified geographic area.

Where county governments exist they correspond to generally accepted county geographic boundaries. However, many areas of the United States lack county government. Organized county governments are not found in Connecticut and Rhode Island, as

well as in some Territories, and the District of Columbia. Numerous cities, such as Baltimore, MD (which is not located within a county government area), and San Francisco, CA (which is a consolidated city/county government), also exist independently of any county government.

County-type areas are included in the *Consolidated Federal Funds Report* as if they were legitimate counties to ensure consistency in the geographic presentation of the data. A complete listing of these areas can be found in appendix A.

Subcounty units of local government consist of municipalities and townships, both of which are used in these CFFR publications to represent geographic areas. Municipal and township governments are not pure geographic areas. These subcounty jurisdictions can overlap, frequently annex land, consolidate to form new governments, and undertake other legal actions which affect their political condition and consequently their geographic boundaries.

It is important to note that the CFFR covers Federal Government payments to governmental units and other recipients located in the geographic areas over which these governments have jurisdiction. The Federal payments to the New York City area could represent monies allocated to the city government, a private company located in the city, or a private citizen residing in the city. No attempt is made in the CFFR to provide information on the recipients of Federal money. Such information could be obtained from analysis of the category of Federal expenditure or financial obligation being reported, or reference to the data sources, which frequently include information on recipient types. The Federal Assistance Award Data System and the Federal Procurement Data System both contain information describing the recipient of Federal Government financial awards.

Volume II presents selected data for subcounty areas—the municipalities and townships. Many of these subcounty jurisdictions cross county boundaries, and actually exist in two or more county areas. In the CFFR, such governments are assigned to only one county;² and all financial data attributable to the municipality or township are shown to the principal county area to which the government is assigned. For presentation purposes, the entire population of each split jurisdiction is shown, even though a portion of the population actually exists in a different county area.

In most cases, the effect of this assignment on the statistical presentation of the data is negligible. However, users should be aware of this treatment, particularly if using data for one of these multicounty jurisdictions. The municipalities of over 50,000 population which exist in more than one county area, and their respective counties and population, are shown in text table A.

All governmental units identified in the census of governments are assigned a numeric code for processing purposes. This governmental unit (GU) code was essential for processing of CFFR data, since data submitted by other Federal agencies had to be converted to a GU code structure. This process is described in the following section "Methodology."

The geographic presentation is in accordance with the governmental unit numeric code. The order is alphabetical by State (with the District of Columbia treated as a State area), followed by the U.S. Territories. Within a State, county areas are generally listed alphabetically, but with some exception for the county-type areas listed in appendix A.

At the subcounty level in this volume, the presentation within a county area is generally alphabetic, with all municipal governments listed first, followed by all township governments, then all independent cities. There are frequent exceptions to the alphabetic sort order, however. Numeric code assignments again served as the key, and these may not follow a purely alphabetic sequence.

The government structure of New York City deserves special mention. Classified for census purposes as a municipality, the city is actually comprised of five county-type areas (Bronx, Kings, New York, Queens, and Richmond). None of these five county-type areas are presented separately in this report. New York City is presented as a single county-type area.

Methodology

The geographic coding of all data in the CFFR was based on the CFFR geographic reference file, developed for the CFFR survey. In summary, this file was developed by equating governmental unit codes representing general purpose local governments to Bureau of the Census geographic place codes. A file for this purpose has been developed at the Census Bureau for bringing together all data elements required in the allocation formula of the General Revenue Sharing Program.

With Census Bureau geographic place codes assigned, all general purpose governmental units were then matched to an equivalent Federal Information Standard (FIPS) State, county, and place code. This was accomplished by processing against the Geographic Identification Coding Scheme (GICS) file developed for the 1980 Census of Population, which contained both Census Bureau geographic and FIPS place codes for named geographic areas.³

At this point, all general purpose governments had been assigned geographic code based upon governmental unit, Census Bureau geographic place, and FIPS place coding schemes. The next step in creating the CFFR geographic reference file was to assign General Services Administration (GSA) location codes. This was done by processing against the FIPS PUB 55 file, which contained a field for GSA codes in each place record. GSA codes were needed because numerous Federal agencies submitting data to the FAADS reporting system use them for geographic identification.

An additional phase of creating the CFFR geographic reference file involved the creation of government unit codes to represent U.S. totals, undistributed data at the United States, State, and county area levels, and "balance" of jurisdiction data at the United States, State, and county area levels. These designations were needed for three reasons.

²The Census Bureau uses the FIPS geographic coding structure at the State and county area level. For subcounty areas, however, FIPS coding is not the primary geographic identification in Census Bureau surveys. Users should refer to the publication *Geographic Identification Code Scheme*, for an explanation of the geographic coding used in the 1980 Census of Population.

³Multicounty jurisdictions are identifiable on the CFFR computer tape data file by a "split flag," indicating that they are actually split among two or more county areas.

1. To ensure that tabulation programs applied against the data file had records in which to put summed detail data.
2. To enable geocoding for data that were submitted in summary form, such as by State (data would be assigned to each appropriate State undistributed code). Governmental units were, in effect, proxies for geographic areas, and amounts reported to a State area could not have legitimately been assigned to a State government code (which were used essentially for totals).
3. To allow geographic records at all appropriate levels of geography (State, county, subcounty) for capturing unmatched data. A program amount reported at a FIPS city code not equating to a government unit could still get geocoded at the subcounty record for balance of county, for example.

There were seven variations of geographic codings used in the data originally submitted for CFFR:

- State name or abbreviation (limited to noncomputerized submissions)
- ZIP Codes
- Federal Information Processing Standard (FIPS) Codes
 - State, county, place
 - State, county
 - State, place
- General Services Administration (GSA) Geographic Location Codes
 - State, county, place
- Government Unit Codes

Data submitted using the first six geocoding schemes had to be converted to government unit coding. For State and county level reporting, the conversion was straightforward. At the subcounty level, however, the conversion was much more complex. None of the geographic coding designations had a one-to-one correspondence with the government unit code scheme. Thus, specific guidelines had to be developed for geocoding data records that could not be matched to distinct governmental units.

These guidelines involved coding at the lowest level of geography. For example, if a data record for a Federal grant award contained a geographic code for an incorporated city that was not defined as a governmental unit, the grant would be assigned to the summary level "balance of county" within the State and county contained in the original geographic code. For this reason, the tables in the CFFR publication contain the geographic designations balance of county, county undistributed, State undistributed, and U.S. undistributed.

Congressional District Reporting

The Congressional district or districts for each county, municipality, and township are displayed in the CFFR table. For those places that have multiple districts, all such districts are displayed.

The congressional districts shown in this publication represent the boundaries of the 99th Congress, which was in session during fiscal year 1985.

In those places with more than one congressional district, dollar amounts are not reported separately for each district. The Federal financial data in the reporting system (data sources) used for the CFFR did not contain such detail, with the exception of partial data records of the Federal Assistance Award Data System.

All data covering Postal Service procurement were reported at the subcounty level of detail only, allowing no basis for distribution by congressional district within the county.

Procurement data (other than Postal Service) were reported at the subcounty level by place of performance. The latter data field in Federal Procurement Data System (FPDS) may not correspond to the contractor location data in the FPDS, which could be used to determine a specific congressional district.

Grants data from the Federal Award Data System have, in some cases, detail on the specific congressional district to which a grant award was made within a location that has multiple districts. Users interested in this detail can make reference to the FAADS reporting system.

Data on loans and insurance that were taken from the FAADS might also have information on specific congressional districts. However, loan and insurance programs with large-scale transactions such as the Veterans Life Insurance program, are covered in FAADS only at the county area summary level. These would not contain specific data on payments by congressional districts.

Several other aspects of the Congressional district coding should be noted:

- For States with an at-large representative, the code "00" is reported.
- For territories with a nonvoting representative to Congress, the congressional district is reported as "98."
- Territories with no representatives have "99" for a congressional district code.
- To derive totals of all funds to any particular congressional district, amounts for all governmental units in that district would have to be aggregated.
- For municipalities that exist in more than one county area all congressional districts are reported, even if they service only that portion of the municipality lying in the multiple county area.

The geographic reference file used in the CFFR is available along with the CFFR data file, on magnetic computer tape. Interested users should contact the Governments Division, Bureau of the Census.

AMOUNTS EXCLUDED FROM CFFR COVERAGE

Federal Government expenditures covered in this volume of the CFFR total \$306.2 billion for fiscal year 1985. This amount may not represent all Federal Government expenditures for grants and procurement. Amounts excluded from the CFFR coverage can be grouped into two general categories—conceptual exclusions and agency/program omissions.

Federal expenditures excluded conceptually include international transactions and foreign payments, and Federal outlay

categories not covered by any of the reporting systems that served as data sources for the CFFR. Foreign procurement reported to the Federal Procurement Data System, but not included in this report, totaled \$10.2 billion during fiscal year 1985. In addition, a small volume of Federal grant awards reported to the Federal Assistance Award Data System as foreign were excluded from this report. Expenditures of the Central Intelligence Agency and National Security Agency were also excluded.

Omissions of data for selected agencies or programs occurred where these did not report under the requirements of the CFFR feeder systems. For some agencies, data for selected object categories could not be obtained. These included the judicial and legislative sectors of the Federal Government (procurement contract actions).

Comparison of amounts reported in the Federal Budget with data reported in the CFFR should be made with caution. Procurement amounts in the Federal Budget would reflect actual outlays and be included under several different object categories within that publication. In the CFFR, procurement amounts represent the dollar value of funds obligated under current year contract actions, and are combined into Defense and nondefense aggregates.

The Postal Service is included in the Federal Budget on a net basis only, with expenditure composed of the payment by the general fund to the Postal Service fund (\$1.2 billion in 1985), and the Postal Service net outlays (spending offset by income—\$1.5 billion in fiscal year 1985). In this volume, Postal Service procurement of \$2.8 million was included, and has no relationship to the Federal payment to that agency.

Table A. Multicounty Municipal Governments of Over 50,000 Population

APPENDIX A

COUNTY-TYPE AREAS WITHOUT COUNTY GOVERNMENTS

Areas with governments legally designated as city counties and operating primarily as cities (8):

Alaska

California

Colorado

Hawaii

Montana

City and borough of Anchorage, city and borough of Juneau, and city and borough of Sitka.

City and county of San Francisco.

City and county of Denver.

City and county of Honolulu.

Anaconda-Deer Lodge County and Butte-Silver Bow.

Areas designated as metropolitan governments and operating primarily as cities (1):

Tennessee

Metropolitan government of Nashville and Davidson County

Areas having certain types of county offices, but as part of another government (city, township, State) (16):

Florida

Georgia

Hawaii

Indiana

Kentucky

Louisiana

Massachusetts

New York

Pennsylvania

County of Duval (city of Jacksonville).

County of Muscogee (city of Columbus).

County of Kalawao (State of Hawaii).

County of Marion (city of Indianapolis).

Lexington-Fayette Urban County.

Parish of East Baton Rouge (city of Baton Rouge), parish of Orleans (city of New Orleans), and Parish of Terrebonne (city of Houma).

County of Nantucket (town of Nantucket) and county of Suffolk (city of Boston).

Counties of Bronx, Kings, New York, Queens and Richmond (all part of the city of New York).

County of Philadelphia (city of Philadelphia).

Cities located outside of any "county" area
and administering functions elsewhere commonly
performed by counties (45):

District of Columbia
Maryland
Missouri
Nevada
Virginia (41 cities)

Washington city.

Baltimore city (distinct from Baltimore County).

St Louis city (distinct from St. Louis County).

Carson City.

Alexandria, Bedford, Bristol, Buena Vista, Charlottesville,
Chesapeake, Clifton Forge, Colonial Heights, Covington,
Danville, Emporia, Falls Church, Fairfax, Franklin,
Fredericksburg, Galax, Hampton, Harrisonburg, Hopewell,
Lexington, Lynchburg, Manassas, Manassas Park, Mar-
tinsville, Newport News, Norfolk, Norton, Petersburg,
Poquoson, Portsmouth, Radford, Richmond, Roanoke,
Salem, South Boston, Staunton, Suffolk, Virginia
Beach, Waynesboro, Williamsburg, and Winchester.

Unorganized areas bearing county designations (15):

Connecticut (8 county areas with no county government).

Fairfield, Hartford, Litchfield, Middlesex, New Haven, New
London, Tolland, and Windham.

Rhode Island (5 county areas with no county government).

Bristol, Kent, Newport, Providence, and Washington.

South Dakota (2 county areas attached to other counties
for governmental purposes).

Shannon and Todd.

Other unorganized county-type areas (13):

Alaska

12 census areas.¹

Montana

Areas of Yellowstone National Park (areas of the park located
in Idaho and Wyoming are included in county areas in those
States).

¹ As of January 1982, Eielson Air Force Base and Kodiak Coast Guard Station were legally outside the boundaries of Fairbanks—North Star Borough and Kodiak Island Borough, respectively, but were included in the county equivalents of Fairbanks—North Star Borough and Kodiak Island Borough, respectively, for purposes of population statistics.

APPENDIX B

Geographic Areas With More Than Four Congressional Districts

State and county area	Congressional districts
California:	
Los Angeles County.....	20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 38, 42
Orange County.....	38, 39, 40, 42, 43
Los Angeles city.....	21, 23, 24, 25, 26, 27, 28, 29, 31, 32, 42
Illinois:	
Cook County.....	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14
Chicago city ¹	1, 2, 3, 5, 6, 7, 8, 9, 11
Massachusetts:	
Middlesex County.....	3, 4, 5, 6, 7, 8
Norfolk County.....	3, 4, 9, 10, 11
Michigan:	
Oakland County.....	6, 7, 14, 17, 18
Wayne County.....	1, 2, 13, 14, 15, 16, 17
New York--New York City.....	6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19
Pennsylvania:	
Philadelphia County.....	1, 2, 3, 7, 13
Philadelphia city.....	1, 2, 3, 7, 13
Texas:	
Harris County.....	7, 8, 9, 18, 22, 25
Dallas city ²	3, 4, 5, 24, 26
Houston city ³	2, 6, 7, 8, 9, 18, 22, 25
Washington:	
King County.....	1, 2, 6, 7, 8

Note: These are congressional districts of the 99th Congress, which was in session during Federal fiscal year 1985.

¹That portion of the city of Chicago that is served by Congressional District 6 lies within Du Page County only.

²The city of Dallas lies within portions of 5 different counties and is served by the congressional districts as follows: Collin County--3, 4; Dallas County--3, 5, 24, 26; Denton County--26; Kaufman County--4; Rockwall County--4.

³The city of Houston lies within portions of 3 different counties and is served by the congressional districts as follows: Fort Bend County--22; Harris County--7, 8, 9, 18, 22, 25; Montgomery County--2, 6, 8.

APPENDIX C

County Locations of State Capital Cities

State	Capital	County Area
Alabama	Montgomery	Montgomery County
Alaska	Juneau	Juneau Borough
Arizona	Phoenix	Maricopa County
Arkansas	Little Rock	Pulaski County
California	Sacramento	Sacramento County
Colorado	Denver	Denver City/County
Connecticut	Hartford	Hartford County
Delaware	Dover	Kent County
Florida	Tallahassee	Leon County
Georgia	Atlanta	Fulton County
Hawaii	Honolulu	Honolulu City/County
Idaho	Boise	Ada County
Illinois	Springfield	Sangamon County
Indiana	Indianapolis	Marion County
Iowa	Des Moines	Polk County
Kansas	Topeka	Shawnee County
Kentucky	Frankfort	Franklin County
Louisiana	Baton Rouge	East Baton Rouge Parish
Maine	Augusta	Kennebec County
Maryland	Annapolis	Anne Arundel County
Massachusetts	Boston	Suffolk County
Michigan	Lansing	Ingham County
Minnesota	St. Paul	Ramsey County
Mississippi	Jackson	Hinds County
Missouri	Jefferson City	Cole County
Montana	Helena	Lewis Clark County
Nebraska	Lincoln	Lancaster County
Nevada	Carson City	Carson City
New Hampshire	Concord	Merrimack County
New Jersey	Trenton	Mercer County
New Mexico	Santa Fe	Santa Fe County
New York	Albany	Albany County
North Carolina	Raleigh	Wake County
North Dakota	Bismarck	Burleigh County
Ohio	Columbus	Franklin County

State	Capital	County Area
Oklahoma	Oklahoma City	Oklahoma County
Oregon	Salem	Marion County
Pennsylvania	Harrisburg	Dauphin County
Rhode Island	Providence	Providence County
South Carolina	Columbia	Richland County
South Dakota	Pierre	Hughes County
Tennessee	Nashville	Metro Nashville-Davidson ¹
Texas	Austin	Travis County
Utah	Salt Lake City	Salt Lake County
Vermont	Montpelier	Washington County
Virginia	Richmond	Richmond City
Washington	Olympia	Thurston County
West Virginia	Charleston	Kanawha County
Wisconsin	Madison	Dane County
Wyoming	Cheyenne	Laramie County

¹Metropolitan Nashville-Davidson is listed as Davidson County in the Consolidated Federal Funds Report.

APPENDIX D

CFFR Data Sources

Category	Source
<u>Grants</u>	
Data submitted to the Bureau of the Census in accordance with Office of Management and Budget requirements:	Annual data submitted to Bureau of the Census pursuant to PL. 97-326 and OMB Circular A-11. Submitting agencies were:
Corporation for Public Broadcasting--public broadcasting fund grants	Corporation for Public Broadcasting
Federal Government annual payment to the District of Columbia	Department of the Treasury
Federal Government payment to Washington Metropolitan Area Transit Authority for interest on outstanding indebtedness	Washington Metropolitan Area Transit Authority
Federal Government payments to Puerto Rico for Customs Service and IRS tax collections	Department of the Treasury
Housing assistance programs (listed by Catalog of Federal Domestic Assistance number):	Department of Housing and Urban Development
Lower Income Housing Assistance--Section 8 (14.156)	
Congregate Services (14.170)	
Housing Development grants (14.174)	
Rental Housing Rehabilitation grants (14.230)	
Public and Indian Housing (14.850)	
Institute of Museum Services--Museum grants (45.301)	Institute of Museum Services
See footnotes at end of table.	

Category	Source
<u>Grants--Continued</u>	
Interior Department--	
Shared revenues from mineral leases, grazing lands, and other Bureau of Land Management payments to State and local governments.	Interior Department, Bureau of Land Management and Minerals Management Service
Territorial assistance	Interior Department, Office of Territorial Affairs
Tennessee Valley Authority--payments in lieu of taxes	Tennessee Valley Authority
General Revenue Sharing grants	Department of the Treasury, Office of Revenue Sharing
National Endowment for the Arts--all programs	National Endowment for the Arts
U.S. Information Agency--	U.S. Information Agency
Educational Exchange Grants	
Graduate Students (82.001) University Lecturers (82.002)	
All other data	Federal Assistance Award Data System (Bureau of the Census)
<u>Procurement</u>	
Postal Service	U.S. Postal Service
All other Federal Government, including Defense Department	Federal Procurement Data Center, General Services Administration
<u>Direct Loans</u>	
Direct Investment Loans and Pre-investment Assistance (Catalog of Federal Domestic Assistance numbers 70.005 and 70.004)	Overseas Private Investment Corporation
All other data	Federal Assistance Award Data System (Bureau of the Census)

See footnotes at end of table.

Category	Source
<u>Guaranteed/Insured Loans</u>	
Higher Education Act Insured Loans (Guaranteed Student Loans--Catalog of Federal Domestic Assistance number 84.032)	Department of Education
Foreign Investment Guarantees (Catalog of Federal Domestic Assistance number 70.002)	Overseas Private Investment Corporation
All other data	Federal Assistance Award Data System (Bureau of the Census)
<u>Insurance</u>	
Foreign Investment Insurance Catalog of Federal Domestic Assistance number 70.003)	Overseas Private Investment Corporation
Crop Insurance	Department of Agriculture, Federal Crop Insurance Corporation
All other data	Federal Assistance Award Data System (Bureau of the Census)

Note: For dollar amounts reported by State, see the publication **Federal Expenditures by State for Fiscal Year 1985**.

APPENDIX E

State Coordinating Agencies State Data Center Program Bureau of the Census

Users who need to access the data contained in the Consolidated Federal Funds Report data file can contact the lead State Data Centers indicated below. The State Data Center program is explained more fully in the introductory text.

ALABAMA

Alabama State Data Center
Center for Business and Economic
Research
University of Alabama
P.O. Box AK
University, AL 35486
Dr. Carl Ferguson, Director
Ms. Annette Watters

- Represents zero.

¹For States and the District of Columbia, represents the estimated resident population as of July 1, 1984 (Census Bureau Revenue Sharing program estimates). For the U.S. Territories of American Samoa, Guam, Northern Mariana Islands, Puerto Rico, and the Virgin Islands, totals represent the estimated resident population as of July 1, 1984. The total population shown for the Trust Territory of the Pacific is as of July 1, 1983. Substate areas in U.S. Territories, where presented, contain the number of inhabitants from the 1980 Census of Population, series PC 80-1-A.

²See appendix B for listing of congressional districts.

³The cities of Baltimore, Maryland, and St. Louis, Missouri are not within the boundaries of Baltimore and St. Louis Counties, respectively.

⁴Population figure includes that portion of the city located outside of the county shown. See text for additional detail.
